

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1056	Martin County Board of County Commissioners	Martin County	All American Ditch Stormwater Quality Retrofit Project	The project consists of construction of a lake, stormwater treatment area, water quality weir, and associated conveyance piping for a 267-acre basin in Palm City.	\$3,025,000	\$3,025,000	\$670,000	no	no	1a
SW-1074	City of Miami Beach	Miami-Dade County	Alternative Stormwater Management Program	Construct pilot stormwater injection well into lower Floridan aquifer to determine feasibility of implementing aquifer recharge system below underground sources of drinking water (USDW) as a means of managing stormwater.	\$54,650,000	\$5,000,000	\$2,500,000	yes	no	1a
SW-1043	East County Water Control District	Lee County	Amberwood 2 Structure	The project consists of replacing the existing broad-crest weir (26 NGVD) with a sharp-crest weir (26.5 NGDV) that has a motorized gate, controls, and telemetry.	\$400,000	\$400,000	\$200,000	no	no	1a
SW-1091	City of Key West	Monroe County	Caroline Street Stormwater	The project consists of infrastructure improvements for a portion of Caroline Street, including 2,145 feet of piping and three triple chamber baffle boxes and associated tide valves.	\$1,286,000	\$1,286,000	\$643,000	no	no	1a
SW-1020	FL Fish & Wildlife Conservation Commission	Charlotte County	Charlotte Harbor Flatwoods Initiative Flowway Restoration (Bond Property)	The project consists of installing two 48-inch risers on the north berm and two 48-inch risers on the south berm of the Bond Property.	\$660,000	\$660,000	\$205,000	yes	no	1a
SW-1071	City of Miami	Miami-Dade County	Citywide Storm Sewer Repair Contract, M-0083	Installation of 24" French Drain storm sewer systems, cross pipes, catch basins, and manholes to address localized flooding/improve WQ by treating groundwater infiltration by installing baffles at main structures.	\$1,991,710	\$995,855	\$995,855	yes	no	1a
SW-1057	Martin County Board of County Commissioners	Martin County	Cypress Creek Weir	The project involves installation of a weir and sediment traps along the Cypress Creek Canal as well as widening and deepening of the Cypress Creek Canal to accommodate higher water elevations.	\$2,500,000	\$300,000	\$150,000	yes	no	1a
SW-1046	Lee County Division of Natural Resources	Lee County	Deep Lagoon Preserve Hydrologic Restoration	The project consists of a study of drainage patterns, wetland conditions, pollution sources, and land uses within the Deep Lagoon watershed; including a watershed analysis and identification of water quality projects.	\$3,000,000	\$400,000	\$400,000	yes	no	1a
SW-1019	Town of Southwest Ranches	Broward County	Dykes Road Drainage and Water Quality Project	The project consists of installing catch basins along Dykes Road and directing stormwater to a 3-acre constructed wetland at Calusa Corners Park.	\$400,000	\$400,000	\$200,000	no	no	1a
SW-1097	Okeechobee County BCC	Okeechobee County	East-West Conveyance System	Improvements will consist of flowway and reservoir construction (earthwork), installation of control structures, culverts, and a stormwater pump station including backup generator.	\$5,445,158	\$1,500,000	\$1,500,000	yes	yes	1a
SW-1047	Lee County Division of Natural Resources	Lee County	Fichters Creek	The project consists of infrastructure improvement for Fichters Creek Lane, CR 78, and Caloosahatchee River Park, including installation of a 6x10 box culvert at Fichters Creek Lane, a double 36-inch culvert at CR 78, three control structures and detention areas, and construction of berms and a filter marshes along the perimeter ditch of the Park.	\$1,800,000	\$900,000	\$900,000	no	no	1a
SW-1031	Hendry County BOCC	Hendry County	Four Corners MSBU / County Line Ditch	The project consists of excavation/reggrading a 330 by 12,000 foot strip of land, installation of two vinyl sheet pile weirs with concrete cap structures, and plantings within the newly created littoral zone.	\$4,200,000	\$4,200,000	\$4,200,000	no	yes	1a

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1048	Lee County Division of Natural Resources	Lee County	FPL Easement Water Quality Improvement Project	The project consists of reconnecting and improving hydrology along the FPL easement (approximately 30,000 feet and 57 parcels) via a series of filter marshes and weirs.	\$20,000,000	\$300,000	\$200,000	yes	no	1a
SW-1023	Collier County Government	Collier County	Golden Gate Estates Watershed Improvement Plan (GGWIP)	The project consists of an essential study that builds on data from previous studies to support development of additional wet season stormwater storage for the Northern Golden Gate Estates watershed.	\$1,400,000	\$200,000	\$100,000	yes	no	1a
SW-1024	Collier County Government	Collier County	Griffin Road Area Stormwater Management Improvement	The project consists of infrastructure improvements to a roadside stormwater conveyance system and downstream outfall structure and creation of a stormwater treatment filter marsh.	\$1,500,000	\$500,000	\$500,000	yes	no	1a
SW-1040	East County Water Control District	Lee County	Halfway Pond South/Phase II	The project consists of restoring the hydroperiod of Halfway Pond South through installation of a pump station.	\$300,000	\$35,000	\$17,500	yes	no	1a
SW-1026	Collier County Government	Collier County	Harbor Lane Stormwater Management Improvement	The project consists of infrastructure improvements to approximately 1,700 feet of roadway.	\$600,000	\$600,000	\$300,000	no	no	1a
SW-1054	Lee County Division of Natural Resources	Lee County	Hendry Creek West Branch Water Quality Improvement Project	The project involves creation of a passive stormwater treatment area along the west branch of Hendry Creek.	\$2,500,000	\$2,500,000	\$1,200,000	no	no	1a
SW-1028	Sunniland Family Limited Partnership	Collier County	JB Ranch Flowway Restoration	The project consists of enhancing natural systems through removal of vegetation, filling of agricultural ditches, and installation of control structures.	\$1,800,000	\$500,000	\$250,000	yes	no	1a
SW-1037	City of Sanibel	Lee County	Jordan Marsh Water Quality Treatment Park - Phase I Design & Engineering	The project consists of diverting water from the Sanibel River to a series of treatment areas and filter marshes on publically owned lands and providing public access/recreational opportunities.	\$400,000	\$50,000	\$25,000	yes	no	1a
SW-1104	Osceola County Government	Osceola County	Lake Tohopekaliga Restoration Initiative (fka Judge)	Project is creation of a stormwater treatment pond and adjacent stormwater treatment area for over 10,000 acres from the Mill Slough and East City ditch subbasins which flow into Lake Tohopekaliga (an impaired waterbody).	\$6,000,000	\$4,000,000	\$4,000,000	yes	no	1a
SW-1012	Palm Beach County ERM	Palm Beach County	Loxahatchee Slough Natural Area PC 17 "C"	The project consists of installation of two operable 96-inch risers with 66-inch outfall pipes through the C-18 west leg canal berm and includes berm restoration and outfall stabilization.	\$250,000	\$250,000	\$125,000	no	no	1a
SW-1073	City of Miami	Miami-Dade County	Mary Brickell Drainage Improvements, B-30637	Upgrade stormwater collection system and a pump station will be constructed to convey run-off through existing box culvert outfall and will include pollution control structures.	\$4,000,000	\$4,000,000	\$2,000,000	no	no	1a
SW-1039	East County Water Control District	Lee County	Modeling	The project is a study to update the current model with secondary canals and physical enhancements since 2007.	\$110,000	\$110,000	\$55,000	no	no	1a
SW-1049	Lee County Division of Natural Resources	Lee County	Nalle Grade Stormwater Park	The project consists of creating a 77-acre stormwater treatment area for 1,984 acres within the Bayshore Creek watershed.	\$3,000,000	\$3,000,000	\$1,000,000	yes	no	1a

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1027	Collier County Government	Collier County	Naples Park	The project consists of infrastructure improvements to 19 streets within Naples Park and includes installation of exfiltration trenches and sediment traps.	\$16,000,000	\$1,600,000	\$800,000	yes	no	1a
SW-1070	City of Doral	Miami-Dade County	NW 41 Street (79-87 Ave) Roadway Reconstruction	The project consists of infrastructure improvements throughout the city, including installation of 24-inch french drain systems, cross pipes, catch basins, baffles, and manholes as needed.	\$3,700,000	\$3,700,000	\$1,850,000	no	no	1a
SW-1012	Plantation Acres Improvement District	Broward County	PAID Master Improvement Plan	The project consists of infrastructure improvements to a rural ranch community (approximately 1,450 acres), including swale creation/restoration and installation of inlets and culverts.	\$19,800,000	\$200,000	\$100,000	yes	no	1a
SW-1067	City of Bonita Springs	Lee County	Pine Lake Preserve Re-Hydration	The project consists of restoring hydraulic connectivity between the Imperial River and the undisturbed wetlands of Pine Lake Preserve through diversion of flows from Terry Street, utilization of two existing shallow burrow pits, and minor grading to re-establish the historical northeast to southwest sheet flow.	\$1,300,000	\$1,100,000	\$500,000	yes	no	1a
SW-1118	City of Port St. Lucie	St. Lucie County	Port St. Lucie Phase 1 Water Farm	The project consists of creating a large multi-phase water farm adjacent to the C-23 canal.	\$6,500,000	\$1,000,000	\$1,000,000	yes	no	1a
SW-1050	Lee County Division of Natural Resources	Lee County	Prairie Pines Preserve Hydrologic Restoration	The project involves restoration of historical flows through the Prairie Pine Preserve through removal of anthropogenic alterations of the land.	\$600,000	\$600,000	\$300,000	no	no	1a
SW-1038	City of Sanibel	Lee County	Sanibel River Nitrogen Bioreactor Pilot Project	The project consists of pilot testing the efficiency of a denitrification bioreactor placed above or below grade.	\$37,040	\$37,040	\$18,520	no	no	1a
SW-1062	Martin County Board of County Commissioners	Martin County	Savannas Preserve State Park Planning Assistance / Regulatory Schedule Project	The project is a study to develop a regulatory schedule for management of surface waters based on ecological, hydrological, and flood control parameters; as well as identify future construction activities which may reduce flooding and improve water quality.	TBD	\$200,000	\$100,000	yes	no	1a
SW-1041	East County Water Control District	Lee County	Section 10	The project is a study for creating an impoundment at the Section 10 mining pit for wet season stormwater storage and conveyance to adjacent wetlands.	\$15,100,000	\$100,000	\$50,000	no	no	1a
SW-1045	Lee County Conservation 2020	Lee County	Six Mile Cypress Slough Preserve North	The project consists of constructing a basin on former agricultural land, installation of water control structures, and creating a flow way from surrounding neighborhoods to the basin.	\$4,075,000	\$1,000,000	\$500,000	yes	no	1a
SW-1117	St. Lucie County Board of County Commissioners	St. Lucie County	SLC Paradise Park	The project consists of infrastructure improvements for a 176-acre subdivision, including construction of ten detention ponds and two outfall structures.	\$2,600,000	\$500,000	\$200,000	yes	no	1a
SW-1051	Lee County Division of Natural Resources	Lee County	Spanish Creek at Daniels Preserve Hydrologic Restoration	The project involves conversion of burrow pits to surface water impoundments and includes construction of berms and littoral zones and installation of backup pumps and the existing pump station.	\$1,000,000	\$1,000,000	\$800,000	no	no	1a

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1032	Spring Lake Improvement District	Highlands County	Spring Lake Improvement District - STA Improvements	The project consists of improvements to the stormwater treatment area, including construction of a 28.7-acre retention pond and a 37.6-acre shallow marsh, wetland plantings, and installation of 72-inch storm pipe with 18-inch rip-rap bedding and a 84-inch riser control structure with a 72-inch tide-flex valve for conveyance.	\$3,765,036	\$1,000,000	\$1,000,000	yes	yes	1a
SW-1089	Village of Palmetto Bay	Miami-Dade County	Sub-Basin 59/60	The project consists of infrastructure improvements for the sub-basin 59/60 per the Palmetto Bay Stormwater Master Plan, including installation of catch basins, sediment traps, pollutant retardant baffles, and exfiltration trenches.	\$900,000	\$900,000	\$450,000	no	no	1a
SW-1052	Lee County Division of Natural Resources	Lee County	Sunniland/Nine Mile Run Drainage Improvements	The project consists of infrastructure improvements for the FGCU Buckingham Campus, including repairs to weirs and the ditch system.	\$600,000	\$600,000	\$300,000	no	no	1a
SW-1044	Lee County	Lee County	Telegraph Creek Preserve	The project consists of filling a washout gully along Telegraph Creek and installing geowebbing and culverts to other land management trails that are eroding.	\$150,000	\$150,000	\$75,000	no	no	1a
SW-1101	Town of Windermere	Orange County	Town of Windermere Stormwater Management Master Plan (SWMMP)	Project proposes to develop a formal Stormwater Management Master Plan (SWMMP)	\$67,007	\$67,007	\$33,503	no	no	1a
SW-1103	Town of Windermere	Orange County	Town-Wide Stormwater Improvements	Project combines eight (8) different Town projects into a single stormwater improvement project element.	\$252,992	\$252,992	\$126,496	no	no	1a
SW-1030	City of Clewiston	Hendry County	Ventura Avenue Drainage and Water Quality Project	The project consists of infrastructure improvements for approximately 3,175 feet of roadway, including curbs, inlet structures, and a stormwater pond.	\$700,000	\$700,000	\$700,000	yes	yes	1a
SW-1114	City of Port St. Lucie	St. Lucie County	Veteran's Memorial Stormwater Quality Retrofit	The project consists of infrastructure improvement and installation of additional stormwater conveyance features along City-owned ROWs, including removal of exotic vegetation, expansion of existing swales, creation of retention ponds, and placement of control structures at existing outfalls.	\$750,000	\$750,000	\$375,000	no	no	1a
SW-1088	Village of Key Biscayne	Miami-Dade County	Village of Key Biscayne Stormwater Improvement Project	The project consists of installation of backflow preventers on pipes along Crandon Boulevard, four gravity wells, pipe connections on Harbor Drive and Ocean Drive, and backflow preventers on outfall structures.	\$2,000,000	\$1,000,000	\$500,000	yes	no	1a
SW-1042	East County Water Control District	Lee County	West Marsh	The project consists of creating a 150-acre stormwater treatment and storage area and restoration of 50 acres of natural systems.	\$7,000,000	\$7,000,000	\$0	Yes	no	1a
SW-1110	City of West Palm Beach	Palm Beach County	Western City Watershed Management and Modernization Initiative	The project consists of a study to support development of the City's Stormwater Master Plan and includes modernization of stormwater management for the western portion of the City, Grassy Waters Preserve and surrounding areas.	\$3,300,000	\$1,300,000	\$300,000	yes	no	1a
SW-1033	Charlotte Harbor NEP	Lee County	WETPLAN	The project is a public outreach and workshop program designed to teach/train BMPs to local residents and sponsor various water quality improvements within neighborhoods.	\$300,000	\$277,000	\$75,000	yes	no	1a

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1053	Lee County Division of Natural Resources	Lee County	Yellow Fever Creek/Gator Slough Transfer Facility Project	The project consists of construction of a surface water pumping station to divert wet season flows from Gator Slough to Yellow Fever Creek, the historical flowway prior to construction of the Gator Slough canal.	\$700,000	\$700,000	\$350,000	no	no	1a
SW-1001	City of Fort Lauderdale	Broward County	1000 NE 17th Way Stormwater Improvements (City Project # 12035)	The project consists of infrastructure improvements along NE 17th Way including swales, retention areas, pollution retardant baffles, and exfiltration trenches.	\$300,000	\$300,000	\$150,000	no	no	1
SW-1002	City of Fort Lauderdale	Broward County	3605 SW 13th Court Stormwater Improvements - City Project #12036	The project consists of infrastructure improvements along SW 13th Street and SW 36th Avenue, including swales and detention areas.	\$400,000	\$400,000	\$200,000	no	no	1
SW-1065	Bal Harbour Village	Miami-Dade County	Bal Harbour Stormwater System Improvements	The project consists of infrastructure improvements for the antiquated stormwater conveyance systems within the Village of Bal Harbour, inclusive of design elements to accommodate anticipated sea level rise.	\$6,721,430	\$2,000,000	\$750,000	yes	no	1
SW-1029	Blue Goose Growers	Hendry County	BGG-FL/GA Culvert Structure	The project consists of replacement or installation (unclear from application) of an existing water control structure within the Hendry Hilliard Canal.	\$68,512	\$68,512	\$68,512	no	yes	1
SW-1077	City of South Miami	Miami-Dade County	Bioswales and Drainage Improvements in Palmer Park Area	Will reduce the volume of runoff (pollutants) generated by a storm event. While this area has an existing drainage system, this site will be improved with the implementation of bioswales and the proposed French drain system/exfiltration trench system.	\$150,000	\$150,000	\$75,000	no	no	1
SW-1084	Town of Cutler Bay	Miami-Dade County	Canal Bank Erosion Project	The project consists of removal of debris and invasive vegetation along the C100B canal.	\$350,000	\$350,000	\$175,000	no	no	1
SW-1003	City of Fort Lauderdale	Broward County	City of Fort Lauderdale Stormwater Modeling Program (City Project #11869)	The project consists of an essential study to create a City-wide stormwater hydraulic model for improvement of the City's stormwater and canal master plans.	\$1,400,000	\$1,400,000	\$700,000	yes	no	1
SW-1007	City of Miramar, FL	Broward County	City of Miramar Historic Drainage System Improvement Project	The project consists of stabilizing canal banks adjacent to 464 waterfront properties along	\$2,150,000	\$340,000	\$170,000	yes	no	1
SW-1008	City of Tamarac	Broward County	City of Tamarac - Receiving Pond Erosion Control Project	The project consists of installation of an articulated concrete block erosion and sediment control system at three master stormwater pump station receiving ponds.	\$500,000	\$500,000	\$250,000	no	no	1
SW-1108	City of West Palm Beach	Palm Beach County	City-wide Parks Master Plan Implementation - Water Quality and Low Impact Development Retrofits	The project consists of infrastructure improvements at several City-owned parks. Specific details are not provided since the project is currently in the planning phase.	\$12,000,000	\$1,000,000	\$500,000	yes	no	1
SW-1109	City of West Palm Beach	Palm Beach County	City-wide Stormwater Master Plan Implementation - Water Quality Improvement Stormwater Retrofits	The project consists of infrastructure improvements throughout the City and ecosystem restoration within Grassy Waters Preserve. Specific details are not provided since the project is currently in the planning phase.	\$30,000,000	\$10,000,000	\$5,000,000	yes	no	1
SW-1005	City of Hollywood	Broward County	COH 29th Avenue Drainage	The project consists of reconstruction of the median swale for North 29th Avenue, including rehabilitating the curb flumes and restoring the original capacity of the feature.	\$250,000	\$250,000	\$125,000	no	no	1

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1006	City of Hollywood	Broward County	COH 64th Ave Drainage Improvement Ph III	The project consists of installation of 3,050 feet of pipe, 24 drainage inlet structures, and nine manholes; which will be connected to a previously constructed detention area.	\$500,000	\$500,000	\$250,000	no	no	1
SW-1094	Monroe County	Monroe County	County Roads Storm Water Improvements	The project consists of implementing stormwater BMPs during major roadway rehabilitation activities, including installation of stormwater control devices.	\$3,315,720	\$1,585,720	\$1,585,720	yes	no	1
SW-1034	City of Sanibel	Lee County	Denitrification	The project consists of implementing denitrification at the Donax Water Reclamation Facility via three deep bed filters.	\$2,000,000	\$1,500,000	\$1,000,000	no	no	1
SW-1035	City of Sanibel	Lee County	Donax Plant Upgrade	The project consists of upgrading Plant 1 of the Donax Water Reclamation facility to a more modern membrane bioreactor (MBR) process.	\$1,700,000	\$1,500,000	\$850,000	yes	no	1
SW-1036	City of Sanibel	Lee County	Dunes Community Weir Modifications	Construct a one-way flap gate on the existing Dunes community weir structure. The goal of this project is to prevent bay water from back flowing into the golf course/community lakes during high spring tides.	\$40,000	\$40,000	\$20,000	no	no	1
SW-1058	Martin County Board of County Commissioners	Martin County	East Fork Creek Stormwater Quality Improvement Project	The project involves construction of a lake and stormwater treatment area and replacement of six upstream culverts with in Mariner Sands, Heritage Ridge, and Poinciana Gardens.	\$2,000,000	\$170,000	\$85,000	yes	no	1
SW-1119	Treasure Coast RC&D Council, Inc.	St. Lucie County	Fort Pierce Farms Water Control District Canal Bank Stabilization Project	The project consists of restoration of Fort Pierce Farms Water Control District's #1 canal and includes stabilization/reshaping of 3.5 miles of banks.	\$1,700,000	\$1,700,000	\$1,700,000	yes	no	1
SW-1072	CITY OF MIAMI	Miami-Dade County	Hadley Park Neighborhood Drainage Improvements	Work consists of the design & permitting of drainage improvements at needed locations within the highest rank sub-basin according to the City of Miami Stormwater Management Master Plan.	\$9,500,000	\$1,425,000	\$712,500	yes	no	1
SW-1025	Collier County Government	Collier County	Haldeman Creek Weir	The project consists of design and construction of a new state of the art weir at Haldeman Creek.	\$1,000,000	\$1,000,000	\$500,000	yes	no	1
SW-1092	City of Key West	Monroe County	Harris Ave	The project consists of installation of an aquifer recharge (gravity) well, 120 feet of 18-inch pipe, eight inlets, and a sediment box near Harris Avenue and 10th Street.	\$550,000	\$550,000	\$225,000	no	no	1
SW-1107	City of Boynton Beach	Palm Beach County	Heart of Boynton Stormwater Improvements	The project consists of infrastructure improvements including 3,000 feet of exfiltration trenches and 10-12 acre-feet of storage and bio-retention basins near outfalls.	\$1,800,000	\$1,400,000	\$1,400,000	yes	no	1
SW-1095	Monroe County, FL	Monroe County	Jo Jean Way Baffle Box	The project consists of installation of baffle a box near the outfall structure for the existing stormwater conveyance system.	\$101,000	\$101,000	\$101,000	no	no	1
SW-1006	Town of Jupiter Inlet Colony	Palm Beach County	Jupiter Inlet Colony Neighborhood Rehabilitation	The project consists of converting 240 existing septic systems to a central sanitary sewer system and simultaneously conducting infrastructure improvements for approximately 4,500 feet of roadway, including road profile adjustments, valley gutters, exfiltration trenches, and storm drainage structures and piping.	\$6,342,750	\$4,385,000	\$1,750,000	yes	no	1
SW-1099	Orange County SWCD	Orange County	Lake Avalon Restoration	Lake Avalon exotic and vegetation removal	\$67,007	\$67,007	\$33,503	yes	no	1

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1113	Town of Lake Park	Palm Beach County	Lake Shore Drive Drainage Improvements	The project consists of reconstruction of 3,250 feet of roadway, including installation of more than 50 storm drainage inlets and 54-inch piping.	\$3,500,000	\$3,500,000	\$2,500,000	no	no	1
SW-1059	Martin County Board of County Commissioners	Martin County	Leilani Heights Stormwater Improvement Project	The project involves creation of a lake and stormwater treatment area at a former wastewater treatment facility site and installation of a conveyance system within the neighborhood.	\$450,000	\$100,000	\$50,000	yes	no	1
SW-1082	Miami-Dade County Public Works and Waste Management Department	Miami-Dade County	Little Arch Creek Salinity Control Reconstruction	The project consists of installation of a new salinity control structure (two 64-inch by 43-inch culverts) 120 feet southwest from the existing structure (two 48-inch culvert), which will be removed.	\$984,000	\$984,000	\$564,000	no	no	1
SW-1098	Okeechobee County BCC	Okeechobee County	Lock 7 Bridge Bypass Culvert System	The project consists of installation of culvert system to bypass Lock 7 Bridge, including 268 feet of 60-inch pipe, two headwalls and drainage structures, and rip-rap.	\$238,836	\$238,836	\$238,836	no	yes	1
SW-1081	Miami Shores Village	Miami-Dade County	Miami Shores Village Street Drainage Project	The project consists of installing french drains at three locations with existing flooding problems.	\$440,000	\$440,000	\$220,000	no	no	1
SW-1066	City of Aventura	Miami-Dade County	NE 191st ST Stormwater Retrofits	The project consists of infrastructure improvements for NE 191st Street (approximately 2,500 feet), including exfiltration trenches, pollutant retardant baffles, gravity wells, and weirs.	\$900,000	\$900,000	\$450,000	yes	no	1
SW-1083	North Bay Village	Miami-Dade County	North Bay Village Stormwater Improvement Project	The project consists of installing flexible valves at 51 stormwater outfalls within the Village of North Bay.	\$980,000	\$980,000	\$735,000	no	no	1
SW-1111	North Palm Beach Heights Water Control District	Palm Beach County	North Palm Beach Heights Water Control District	The project consists of restoration of NC-3 canal, including 3,000 feet of grading and installation of turf reinforcement and Bahia sod.	\$220,000	\$220,000	\$110,000	no	no	1
SW-1060	Martin County Board of County Commissioners	Martin County	North River Shores 2nd Generation Baffle Box Project	The project consists of retrofitting up to 26 baffle boxes and installing filtration screen systems to remove vegetation, litter, and hydrocarbons from stormwater.	\$500,000	\$60,000	\$30,000	yes	no	1
SW-1075	City of Miami Gardens	Miami-Dade County	NW 203rd St Outfall Retro-fit Project	The project consists of replacing two outfall ditches with culverts. Reduces the propensity for sedimentation and blockage of the system. (0.343 acres restored)	\$562,391	\$562,391	\$250,000	no	no	1
SW-1069	City of Doral	Miami-Dade County	NW 33 Street (79-82 Ave) Roadway Reconstruction	The project consists of infrastructure improvements along NW 41 Street, including installation of a closed drainage system with interconnected inlets, manholes, and exfiltration trenches.	\$1,600,000	\$1,600,000	\$800,000	no	no	1
SW-1096	City of Okeechobee	Okeechobee County	Okeechobee, City stormwater and canal project	The project consists of removal and disposal of muck from 2,150 feet of a City canal.	\$533,500	\$185,000	\$185,000	yes	yes	1
SW-1061	Martin County Board of County Commissioners	Martin County	Old Palm City Phase 4 - Stormwater Treatment Areas Project	The project consists of creating three detention areas or stormwater treatment areas for a 30-acre basin.	\$1,100,000	\$100,000	\$50,000	yes	no	1
SW-1093	City of Key West	Monroe County	Patricia and Ashby Neighborhood Piping	The project consists of installation of an injection (pressure) well, 650 feet of 18-inch piping, and 16 inlets in the vicinity of the Patricia and Ashby Street Pump Station.	\$1,620,000	\$1,620,000	\$810,000	no	no	1

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1105	Village of Tequesta	Palm Beach County	Plan to Revitalize Impaired Waters and reduce pollutants discharged into the Loxahatchee River	The project consists of infrastructure improvements for approximately 1,100 feet of roadway per BMPs, including exfiltration trenches, storm drainage structures, piping, pollution retardant baffles, and swales.	\$300,000	\$300,000	\$150,000	yes	no	1
SW-1085	Town of Cutler Bay	Miami-Dade County	Point Royale Section 5 Water Quality Improvement Project	The project consists of modifying existing catch basins to provide sediment traps, pollutant retardant baffles, and weir structures and construction of three catch basins, 940 feet of french drains, 18 concrete aprons, 105 feet of 18-inch pipe, and 12 manholes within the sub-basin.	\$570,980	\$570,980	\$285,490	no	no	1
SW-1013	Pompano Beach	Broward County	Pompano Beach Avondale Neighborhood Stormwater Project	The project consists of infrastructure improvements to the Avondale Neighborhood, including a pump station, detention areas, and/or exfiltration trenches.	\$2,229,945	\$2,229,945	\$891,978	no	no	1
SW-1014	Pompano Beach	Broward County	Pompano Beach Esquire Lake Stormwater Project	The project consists of infrastructure improvements to the Esquire Lake Neighborhood, including swale regrading, installation of exfiltration trenches, and improve of sub-basins connectivity.	\$1,506,478	\$1,506,478	\$602,591	no	no	1
SW-1015	Pompano Beach	Broward County	Pompano Beach Future Stormwater Projects	The project consists of 19 projects identified in the City's 2013 Stormwater Master Plan which are anticipated for construction between 2017 and 2023.	\$31,848,462	\$0	\$0	yes	no	1
SW-1016	Pompano Beach	Broward County	Pompano Beach Lyons Park Stormwater Project	The project consists of infrastructure improvements to Lyons Park Neighborhood, including swale regrading, installation of exfiltration trenches, and improve of sub-basins connectivity.	\$2,180,809	\$2,180,809	\$872,323	no	no	1
SW-1010	City of West Park	Broward County	S.W. 25th Street Stormwater Improvements	The project consists of infrastructure improvements along Hallandale Beach Road from SW 40th Avenue to 441 (approximately 1.50 miles), including catch basins, inlets, drainage outlets, curbs, gutters, trenches, and landscaping for retention.	\$800,000	\$800,000	\$400,000	no	no	1
SW-1011	City of West Park	Broward County	S.W. 40th Avenue Drainage Improvements	The project consists of infrastructure improvements along SW 40th Avenue from Pembroke Road to County Line Road (approximately 1.50 miles), including catch basins, inlets, drainage outlets, curbs, gutters, trenches, and landscaping for retention.	\$1,000,000	\$1,000,000	\$500,000	no	no	1
SW-1017	South Broward Drainage District	Broward County	S-8 Pump Station By-Pass Culvert and Sluice Gate	The project consists of installation of a 48-inch by-pass culvert and sluice gate at South Broward Drainage District S-8 Pump Station.	\$80,000	\$80,000	\$40,000	no	no	1
SW-1086	Town of Cutler Bay	Miami-Dade County	Saga Bay 1.2 Sub-Basin Water Quality Improvement Project	The project consists of installation of six catch basins with sediment and pollutant retardant baffles, 725 feet of 18-inch pipe, 250 feet of french drain, and weir structures and replacement of three existing catch basins.	\$330,500	\$330,500	\$165,250	no	no	1
SW-1116	St. Lucie County Board of County Commissioners	St. Lucie County	SLC Culvert Improvements	The project consists of replacing culverts at Orange Ave, Selvitz Rd, and Angle Rd; which convey stormwater beneath major arterial roadways of the County.	\$1,800,000	\$1,800,000	\$720,000	no	no	1
SW-1115	St. Lucie County Board of County Commissioners	St. Lucie County	SLC North Hutchinson Island Septic Removal Project	The project consists of installation of a sanitary sewer network for 578 properties with legacy septic system, 340 of which are adjacent to the waterfront and less than 100 feet from the St Lucie River Estuary/Indian River Lagoon.	\$5,750,000	\$350,000	\$140,000	yes	no	1
SW-1004	City of Fort Lauderdale	Broward County	Soccer/Lacrosse Athletic Fields- City Project #12060	The project consists of modifying 5 acres of Mills Pond Park and implementing BMPs such as swales and detention areas.	\$4,000,000	\$3,000,000	\$925,000	yes	no	1

FY2016 Cooperative Funding Program

Feb 12, 2015

Part 1 Preliminary Grouping
Stormwater Management

Proposal Number	Applicant	County	Project	Description	Total Project Cost	FY16 Project Cost	FY16 Funding Request	Multi-Year	REDI	Preliminary Grouping
SW-1055	Town of Sewall's Point	Martin County	South Sewall's Point Road, Mandalay to Marguerita	The project consists of infrastructure improvements within the Town of Sewall's Point, including installation of a 0.45-acre detention area, exfiltration trenches, and a baffle box.	\$925,000	\$50,000	\$25,000	yes	no	1
SW-1090	Village of Pinecrest	Miami-Dade County	Stormwater Master Plan	The project consists of a study to develop a stormwater master plan for the Village of Pinecrest, including identification of impacts from sea level rise.	\$342,680	\$100,000	\$100,000	yes	no	1
SW-1018	South Broward Drainage District	Broward County	Sw 54 Place/SW 164th Terrace Culvert Replacement	The project consists of replacement of an existing 24-inch culvert with a 48-inch culvert.	\$85,000	\$85,000	\$42,500	no	no	1
SW-1009	City of Tamarac	Broward County	Tamarac Village Stormwater Project	The project consists of installation of new stormwater (and potable water/sanitary sewer) infrastructure for the City's Tamarac Village, a currently vacant and/or blighted area.	\$2,000,000	\$2,000,000	\$196,000	no	no	1
SW-1087	Town of Medley	Miami-Dade County	Tobie Wilson Park Canal Seawall	The project consists of repair of approximately 1000 feet of seawall and construction of approximately 740 feet of new seawall.	\$750,000	\$750,000	\$375,000	no	no	1
SW-1078	City of South Miami	Miami-Dade County	Twin Lakes Stormwater Drainage Phase III	Includes an exfiltration trench system to collect storm runoff and provide water quality and quantity	\$450,000	\$450,000	\$225,000	no	no	1
SW-1068	City of Coral Gables	Miami-Dade County	Water Quality Improvements - City of Coral Gables Outfalls	The project consists of installation of five baffle boxes at major outfalls for the City of Coral Gables.	\$200,000	\$200,000	\$100,000	no	no	1
SW-1100	Orange County SWCD	Orange County	West Orange Reforestation	Replacement trees for new development	\$252,992	\$252,992	\$126,496	yes	no	1
SW-1063	Martin County Board of County Commissioners	Martin County	Willoughby Creek Stormwater Quality Improvement Project	The project consists of installation of water control structures and construction of deep retention acres and a stormwater treatment area.	\$1,550,000	\$200,000	\$100,000	yes	no	1
SW-1022	Collier County	Collier County	Zero-Stormwater Discharge at NCWRF Feasibility Study	Development of a feasibility study to determine if the stormwater discharge at the NCWRF can be harvested and treated to supplement the Irrigation Quality supply for distribution through the County's significant IQ distribution system.	\$100,000	\$100,000	\$75,000	no	no	1
SW-1076	City of Opalocka	Miami-Dade County	Stormwater Roadway Drainage Improvement Project	The project consists of installation of a stormwater system along six major roadways within the City of Opalocka.				—	no	Application not completed
SW-1103	Osceola County Government	Osceola County	Kissimmee View Treatment Facility	The project includes expanding a 4.5-acre detention pond to 12.5 acres and installation of a stormwater conveyance system between the expanded detention pond and adjacent 133-acre residential area.	\$1,900,000	\$1,600,000	\$800,000			Withdrawn on 02/02/2015
